Position: Doctor of Naturopathic Medicine (ND)
Job Type: Full-Time (4+ Days/Week)
Industry: Health Care
Compensation: Commission (Sub-Contractor)

Active Approach Health & Wellness Centre has been operating as a busy multi-disciplinary health clinic on Spring Garden Rd., Halifax for the past 15 years. We offer a variety of therapeutic options to help patients achieve a healthy and active lifestyle. Our healthcare providers see patients regularly for sports injuries, chronic pain, headaches, and low back/neck pain. Our treatment approach is proactive and tailored to each and every patient's specific needs. Our doctors of chiropractic, physiotherapist and massage therapists employ various hands-on techniques and therapeutic modalities to ultimately help patients recover quickly and permanently. Many of these patients attending the clinic often have concurrent systemic health conditions that fall under the scope of practice for a doctor of naturopathic medicine. As such, we have had a thriving ND practice at the clinic for over four (4) years with a current 1-2 week wait list for appointment times. Our patient base is a diverse mix of all demographics, but the young to middle-age professional is commonly seen.

We are recruiting a doctor of naturopathic medicine to complement our multi-disciplinary approach to health and wellness. We are seeking an ND to provide services four (4) days per week or more, with the flexibility of working early evenings and occasional Saturdays. Full administrative support provided. Most major clinical and office equipment/furniture is provided. We provide patients direct billing through Medavie Blue Cross and Telus Health Solutions. Underground parking is available at the clinic on a monthly rental with the building. An experienced, professional, hard-working and goal-oriented person is required to fill this role, and we are looking for someone seeking long-term stability with the practice. Position is available to start in June, 2021.

This is an incredible opportunity for an ND looking to take over an established and dedicated patient base. Our existing longstanding ND is leaving to pursue other clinical opportunities leaving a full patient case load. We are a very busy clinic and all of our DCs, PT and RMTs regularly refer patients to our ND.

Skills and Experience Required:

- Friendly, caring and professional interpersonal skills are essential
- A dedicated therapeutic approach on patient-centered, evidence-informed treatment options
- Minimum 1 year of ND experience preferred, but new practitioners welcome to apply.
- Ability to work well with others and work in a team environment
- Previous experience working with chiropractic, physiotherapy, massage therapy and other healthcare fields would be an asset
- The use of evidence-based medicine to complement other areas of our clinic
- Training and experience in TCM Acupuncture and Bowen Therapy is an asset

Additional information about our clinic is available at www.activeapproach.ca
